How To Trade Stellar (XLM) Futures On BTCC

Original:

<https://www.btcc.com/en-US/academy/crypto-basics/how-to-trade-stellar-xlm-futures-on-btcc>

XLM (Stellar) is a new payment system, which is similar to Ripple, launched by McCaleb, the original founder of Mt-Gox and Ripple.

The network created by Stellar has the same functions as the Ripple payment network. It is able to transfer any currency through it, including U.S. dollar, euro, RMB, yen and bitcoin. It is easy and fast to process. It relies on Bitcoin blockchain technology. It can connect to 180 currencies in the world within 2-5 seconds, including banks, payment systems and the general public, reducing transaction fees and time delays caused by cross-border payments. The circulating market value of XLM is 3.339 billion, and the current price of XLM is \$0.16. XLM will increase by 203.86% in 2020.

If you want to invest in XLM , in addition to spot trading, you can also buy and sell [XLM margin trading](#) to earn. Compared with spot trading, the advantage of margin trading is that it allows you to earn, it doesn't matter the price of XLM rises or falls. Besides, margin trading allows you to add leverage and trade with little amount of asset.

What are Stellar (XLM) Futures

A Stellar futures contract is an agreement to buy or sell a certain amount of Stellar (XLM) at a predetermined price at a future date.

Stellar futures markets offers two crucial aspects to cryptocurrency investors:

- Buying XLM futures permits traders to leverage their holdings of Stellar coins (10x to 50x not

uncommon)

- By selling XLM futures, traders can profit from a decline in the XLM price.

Due to the fact that Stellar futures contracts traded on the majority of cryptocurrency exchanges today have no expiration dates, they are also known as Stellar perpetual futures or Stellar perpetual swaps.

How to Long Stellar (XLM) Futures

If you anticipate a future increase in the price of Stellar, you can invest in that increase by purchasing XLM futures. A long XLM futures position is another name for this trading technique.

If you buy a \$100 XLM futures contract, you will effectively “own” \$1,000 worth of Stellar due to the leverage factor of 10x. Warning: If the price of XLM drops more than 10%, you could lose your entire \$1,000 investment.

Suppose XLM is priced at \$0.01 USDT per token. A bullish XLM futures trader opens a long position at that price by purchasing 100,000 XLM futures contracts with 10x leverage.

With a contract size of 1 XLM per contract, the initial margin needed to open this position is: $100,000 \times \$0.01 / 10 = \$1,000$. Depending on the performance of the XLM price, the trader might either earn a substantial profit or lose his entire investment.

Why Trade Stellar (XLM) Futures on BTCC

To trade XLM futures, you can choose BTCC crypto exchange. [BTCC](#) was founded in June 2011 with the goal of making crypto trading reliable and accessible to everyone.

We specialize in crypto futures contract trading, offering perpetual futures contracts. The maximum leverage offered by BTCC for daily futures contracts is 150x. The vast variety of futures offered by BTCC accommodates the trading habits and objectives of both novice and seasoned traders. We offer the USDT-margined futures and Coin-margined futures. Users can trade futures using USDT or cryptos like BTC, ETH, and XRP. And large orders of up to 300 BTC can be executed at the top price levels.

Here are the main advantages of using the BTCC crypto exchange to trade XLM futures:

- Largest variety of futures: Daily and Perpetual futures
- Flexible leverage from 10x to 150x
- Lowest trading fees 0.03%
- Industry-leading market liquidity
- Plenty of campaigns to win exciting rewards

How To Trade Stellar (XLM) Futures On BTCC

STEP 1: [Log in btcc.com](https://btcc.com) and click upper right to register

STEP 2: Select XLM/USDT perpetual contract

STEP 3: Select the BTCC margin trading order type

BTCC margin trading orders are divided into market orders, limit orders and stop loss orders.

Market order ?		Limit order ?		Stop order ?	
Leverage	20x ▼	Leverage	20x ▼		
Most Favorable Price		Most Favorable Price			
-	1000	+		-	1000
Set Stop-Limit <input type="checkbox"/>		Set Stop-Limit <input type="checkbox"/>			
Contract value	189.29USDT	Contract value	188.68USDT		
Reference margin	10.00USDT	Reference margin	10.00USDT		
Buy (ADA/USDT)		Sell (ADA/USDT)			

- Market orders: Users place orders at the best price in the current market to achieve fast trading.
- Limit order: A limit order is used to copy the top/bottom, and refers to a buy/sell price set by the user. After the market reaches the limit price, the margin trading can be executed.
- Stop Order: A stop order is an advanced limit order, and users can customize a buy/sell price. After the market reaches the limit price, the margin trading can be executed.

STEP 4: BTCC provies 20x XLM/USDT perpetual contract

Market order [?] Limit order [?] Stop order [?]

Leverage	20x ▼	Leverage	20x ▼
Most Favorable Price		Most Favorable Price	
-	1000	+	
Set Stop-Limit <input type="checkbox"/>		Set Stop-Limit <input type="checkbox"/>	
Contract value	189.29USDT	Contract value	188.68USDT
Reference margin	10.00USDT	Reference margin	10.00USDT
Buy (ADA/USDT)		Sell (ADA/USDT)	

STEP 5: Choose the lot size

The XLM trading unit at BTCC allow user to choose the number of lots based on their investment situation, and the range can be selected from 1000 to 150000 lots. There are real-time contract values and reference margins below.

Market order ?		Limit order ?		Stop order ?	
Leverage 20x ▼		Leverage 20x ▼			
Most Favorable Price		Most Favorable Price			
-	1000	+	-	1000	+
Set Stop-Limit <input type="checkbox"/>		Set Stop-Limit <input type="checkbox"/>			
Contract value	189.29USDT	Contract value	188.68USDT		
<u>Reference margin</u>	10.00USDT	<u>Reference margin</u>	10.00USDT		
Buy (ADA/USDT)		Sell (ADA/USDT)			

STEP 6. Set the take profit and stop loss price

Market orders, limit orders and stop orders all need to set a take-profit and stop-loss price. The difference is that market orders are executed immediately at the best price, while limit orders and stop orders need to be set for the same day or a week.
