## **What is AVACOIN (AVACN)?**

In addition to staking, a dedicated tasks page, changes to the referral program, and a revamp of the in-game user interface, Avacoin token allocation has also taken place. Here, we'll address any pressing question you might have about TGE and provide a comprehensive rundown of these features.

Following Notcoin's introduction as a Telegram mini-app, several other tap2earn games emerged; however, unlike Notcoin, avacoin allowed users to do more than simply accumulate crypto tokens; instead, players could earn in-game coins up to a certain point and then exchange them for US dollars.

After some time, though, the game underwent some alterations, and the developers began toying with the idea of Token Generation. This would allow players to sell the Avacoin Token for all their tap-to-earn coins on cryptocurrency exchanges.

Along with the closure of the tap2earn or mining way of earning coins, new features were implemented on June 1st. You should have noticed your new balance and the total overhaul of the user interface if you've been playing for a while and finished level 1 verification. This article will go over all of the new features that have been added to the game.
