Battle Infinity Price Forecast in 2022—Is this the Next 100x Project?

Original:

<https://www.btcc.com/en-US/academy/research-analysis/battle-infinity-price-forecast-in-2022-is-this-the-next-100x-project>

The key to making significant gains from the [cryptocurrency](#) market is to invest early. You need to get tokens before word gets out and investors flood the market, driving the price through the roof. New ventures with bold goals and achievable timelines should be prioritized above overpriced assets with high market capitalization.

This article presents the Battle Infinity Price Forecast in 2022. [Battle Infinity](#) is a [metaverse](#)-focused, play-to-win gaming platform that revolutionizes the [blockchain](#) gaming industry. The rationale for the estimated cost is examined as well, including how the project's goals and current progress support it.

Battle Infinity Price Forecast in 2022

In 2018, [Battle Infinity](#) is one of the most looked-forward-to releases. Even though the project was just recently revealed, it has already received a lot of attention from the crypto community. In addition to playing and battling, players in Battle Infinity can also earn, communicate with other

players, explore, and discover new areas of the virtual world. There are now six products in development catering to players in the [NFT](#), [DeFi](#), and gaming industries, creating a comprehensive ecosystem. Battle Infinity's several revenue models provide players the chance to transform their pastime into a lucrative career. The Battle Infinity ecosystem is only accessible with the IBAT token.

The project is now in the presale stage, which is expected to remain for 90 days. The current exchange rate is 1 BNB = 166,666.66 IBAT. The token will thereafter be listed on major cryptocurrency exchanges including PancakeSwap. When listed on PancakeSwap, IBAT is expected to have high demand, as is the case with other authentic tokens with sound white papers. We anticipate a 30X-40X increase in pricing during the next few hours. Battle Infinity has an aggressive road map that can quickly close the gap even if the price drops in the coming days due to the inevitable early-stage dumps.

The next phase of the roadmap, for instance, details the introduction of the Battle Swap testnet, the introduction of the Battle Swap mainnet, the introduction of the Battle Infinity Dapp Alpha (Google Play Store), and the introduction of the Battle Swap goods store. Despite the lack of detail in the roadmap, we anticipate significant progress in Battle Infinity this year. IBAT might skyrocket as much as 50 times by the end of 2022 if the project succeeds in developing its products and increasing its media presence through influencer marketing and community events.

Long-Term Battle Infinity Price Forecast

As soon as Battle Infinity distributes its products and games, the IBAT token's value will be driven solely by utility, rather than speculation. Access to Battle Infinity games, in-game purchases, and staking are just a few of the many ways IBAT tokens can be put to use in the ecosystem. The plan lays out the major steps, such as integrating a physical map and promoting the product through celebrity endorsements and strategic alliances.

Since no other game just like Battle Infinity exists, it stands to reason that this series will quickly amass a sizable following in the coming years. Experts in the crypto sector and among crypto fans believe Battle Infinity will replace Axie Infinity. Battle Infinity, in all honesty, has a more robust gameplay and ecosystem than Axie Infinity. In contrast to Axie Infinity, which relies on a straightforward breeding system to keep players engaged, Battle Infinity introduces a number of fantasy sports games to the metaverse. One of the most promising cryptocurrencies in the works, thanks to the team's dedication to solid technical development and long-term success.

As the number of users increases in the next stages of growth, the demand for the token will increase in tandem, making early-stage investors very wealthy.

Battle Infinity, Explained

Here's a quick primer on the upcoming 100X crypto project if you've just heard about Battle Infinity through word of mouth or a chance web encounter.

Video game platform Battle Infinity introduces a variety of pay-to-win combat games into the metaverse. The IBAT Battle Arena is a virtual world where people from all around the world can compete in high-stakes games. Unlike on other gaming platforms, here you do more than just play and fight. You can also accumulate prizes in the form of IBAT tokens, which have an actual market worth. You can turn your pastime into a source of revenue by buying and selling them on a stock exchange. How does that sound? This isn't all of it. Battle Infinity will be a metaverse where players can engage with one another, hold and attend events, and fully immerse themselves in a simulated world.

The goal of the project is to use blockchain and metaverse technology to usher in a new era of gaming. If all goes according to plan, Battle Infinity will be an open, accessible, and equitable community where all players and artists have full control over their virtual possessions and intellectual property.

Why Battle Infinity Might Be the Next 100X Project

The Battle Infinity presale has officially begun, and in just the first three days, 500 BNB (about \$110,000) has been raised. Given the early stage of development and the fact that the 90-day presale began without any prior promotion, the positive response bodes well for IBAT's future expansion. If the presale keeps going like this, the coin will be sold out before its expected release date.

This is why we think Battle Infinity has the potential to become the next 100X crypto initiative.

According to fresh findings from McKinsey & Co., the value of the metaverse might reach \$5 trillion by 2030. "The metaverse is too large for businesses to ignore," the paper states. Battle Infinity is the first play-to-earn gaming ecosystem built on the blockchain, which will be available in the growing metaverse. It incorporates cutting-edge innovations to produce an engaging, dynamic setting in which gamers can earn a living from their talents.

The projected CAGR for the fantasy sports industry between 2021 and 2027 is 13.9%, which would lead to a market size of \$48.6 billion by 2027. Metaverse, cryptocurrency, and NFT integrations give Battle Infinity a leg up on the competition.

As we have shown, even the most widely used project might fail suddenly owing to technological flaws. To guarantee the items are suitable for widespread usage, Battle Infinity subjects them to rigorous testing and auditing procedures.

BSC is the foundation of Battle Infinity and is often regarded as a more scalable alternative to Ethereum and other widely used blockchains. Due to the reduced transaction times and costs, gamers can play uninterrupted.

The team behind Battle Infinity consists of experts from a variety of fields, each with their own technical and creative expertise. In the cryptocurrency market, their decision to go public with their identities is a very bullish indicator. The team's previous successes provide them credibility for this endeavor. There is a cap of 10.5% of available IBAT tokens per team.

Conclusion

Due to Battle Infinity's robust ecosystem, IBAT has the potential to become the next crypto token to increase in value by a factor of 100 or more. By the end of the year, the token's value might exceed US \$0.075 if the project follows its roadmap. In 2023, it has the potential to reach an all-time high of 0.1875 thanks to the introduction of novel products and the expansion of the ecosystem at large.

Want to Know more about Battle Infinity ? You can click [BTCC](#) for more information!

Founded in June 2011, BTCC is a cryptocurrency exchange based in Europe. We are dedicated to making crypto trading reliable and accessible to everyone. As the world's longest-running cryptocurrency exchange, BTCC has always put a strong emphasis on improving every aspect of trading, striving to create a fair trading atmosphere for all crypto lovers around the world.
