Can X Empire Reach \$0.1? X Empire Price Prediction

Given the bullishness of the [cryptocurrency](#) market, holders are aiming for the \$0.1 even if the price of X Empire has hit yet another new all-time high of \$0.00058.

The price of X Empire reached a new all-time high just hours ago, following a 1000% increase over the course of the week. More significantly, it has emerged as one of the week's most optimistic cryptocurrencies. This is a noteworthy milestone since it has enabled numerous investors to achieve substantial profits. This is considerably more than that, though, given its prior downward trajectory and users' dissatisfaction following the airdrop distribution. In any case, the token is still absurdly distant from reaching the \$1 target that was previously anticipated, but many people think the \$0.1 level is still reachable.

[TRADE_PLUGIN]BTCUSDT,ETHUSDT[/TRADE_PLUGIN]

After Reaching New All-Time High, X Empire Price Remains Bullish

After a brief upswing, the X token's listed price of \$0.00009599 fell into a downward spiral. A record low of \$0.00003315 was reached eight days ago as a result of this slump that lasted for days. Since both HMSTR and Hamster Kombat were native tokens of Telegram Tap, many saw similarities in their price performance and drew comparisons to the performance of those two immensely popular

games. On the other hand, their demise was comparable; both projects saw a decline in user opinion due to impromptu airdrop adjustments.

The good news is that the trends turned around, and the altcoin started to rise again, increasing its value by 1048% in just one week. While this was happening, it set two new all-time highs, reaching \$0.0002165, its first X Empire ATH, on November 9. Having achieved a new all-time high of \$0.00058 about 22 hours ago, the price has now doubled, and following a small pullback, is now trading at \$0.0004256. This means the coin is finally going to do what its holders and gamers have been hoping for: rise to \$0.1.

But we still have a long way to go before we reach our goal, and we're worried about more selloffs or downtrends like the one we had immediately after debut.

Can X Empire Reach \$0.1?

To reach the \$0.1 goal, the token had to surge 100 times, despite its bullishness. Nevertheless, given the current state of the crypto market, it may be difficult for the token to remain bullish, since several major cryptocurrencies have experienced drops today. In addition, the RSI is at 84.95961001, suggesting overbuying and potential price consolidation, while the technical indicators show selling pressure in the X Empire price chart. Even though market users are greedy, this explains why it fell from \$ATH to \$0.0004256. Nevertheless, a quick recovery from the current consolidation can be possible due to the strong purchasing push.

Numerous cryptocurrency experts have speculated that it could surge past the present all-time high (ATH) to \$0.001 or even higher. But the cryptocurrency market and user reaction will determine that. With a 143% increase to \$1.65B in trading volume, the X token is clearly in strong demand. In addition, the user's sentiment is greedy, and the upward trend in Bitcoin is still going strong. The token's value might skyrocket if it happens.

Again X is going to hit 1000%

You are still early if you enter now [#XEmpire \\$X pic.twitter.com/BYmHfjXD7e](#)

While the X Empire's \$0.1 goal is currently too ambitious, it is not out of the question in the future, particularly with the premiere of Season 2.

Where to Trade Crypto Futures?

You can trade crypto futures on BTCC Now. Over 300 USDT-margined perpetual trading pairs are available for users to trade, including many popular altcoins and meme-coins.

[Trade crypto futures Now](#)

You can deposit and receive up to [10,055 USDT](#) now when you sign up and verify your account on BTCC. Every new user gets a **10 USDT** coupon after completing their registration. You will also get an additional **20 USDT** coupon on completing your KYC verification.
