What is EthereumPoW?

PoW Ethereum or ETHW is a forked version of the Ethereum blockchain created by a Chinese miner before the Merge of the execution and consensus layers.

The long-awaited “The Merge” upgrade for Ethereum reduced the requirement for miners. It replaced them with validators who stake Ether rather than using costly and energy-intensive devices to secure the network, significantly increasing the cryptocurrency’s energy efficiency. However, ahead of the Merge, a hard fork of the Ethereum network, called ETHW, which still uses the PoW consensus mechanism, was created, leading to a triumph for ETH miners.

But who is behind ETHW? Chinese miner Chandler Guo opposed the PoS consensus method and launched the PoW-based Ethereum blockchain. Although creating the PoW Ethereum chain could be a victory for miners over stakers, ETHW users suffered accessibility issues.

The chain ID that ETHPoW used is 10001, but it was already in use by a Bitcoin Cash testnet. As a result, the MetaMask cryptocurrency wallet users faced issues as the Chain ID, acting as an identifier, could not differentiate between two separate blockchains.

Chain IDs can be chosen at will because there is no central repository or registry, but pre-hard fork testing would have found the contradiction, whereas the team behind ETHW ignored the issue. Despite this, crypto exchanges like Binance and Coinbase showed support for ETHW. For instance, Binance announced its ETHW mining pool, stating that it will be subject to the same review process as other cryptocurrencies.

How Does EthereumPoW Work?

The initial version of the Ethereum network (i.e., Ethereum Classic) was based on the PoW consensus method. However, this version was hard forked to secure the network due to the DAO hack. EthereumFair and EthereumPOW are the other two hard forks of the original Ethereum blockchain that will continue to use proof-of-work mining.

Proof-of-work cryptocurrencies like Bitcoin are promoted as a censorship-resistant, trustless type of digital money created after one person or a small group of people solve a mathematical puzzle and propose a new block. However, to prevent any small group of miners from enacting rules that would weaken the resistance to censorship, many non-colluding miners must be processing transactions.

Similarly, to stop anyone from abusing the system, ETHW miners will also continue to solve arbitrary mathematical challenges to validate transactions and mine new tokens. In return, they will be rewarded with ETHW, the native asset to the ETHPoW chain.

Current EthereumPoW Price

At the time of writing, EthereumPoW is trading at \$2.08 with a market capitalization of \$224,931,752, ranking #131 amongst all cryptocurrencies by that metric. In the past 24 hours, the ETHW coin price has increased by 0.20% with a trading volume of \$24,276,357.

The current price level means that has risen by 19.6% in the past fortnight. Now let's move on to the ETHW price prediction for 2023 and beyond.

ETHW Price Prediction 2023, 2025, 2030

We've covered most of the important things you need to know about EthereumPoW before considering its price prediction. If you are really interested in investing in the coin, this is the time

to be more attentive. Do note, however, that predictions are not a substitute for your own research and due diligence.

Below pulls together our EthereumPoW price prediction for 2023, 2025 and 2030, ensuring you have a rough idea of the coin's future value potential:

YEAR	MINIMUM PRICE	MAXIMUM PRICE
2023	\$2.41	\$2.78
2025	\$5.24	\$6.27
2030	\$14.86	\$16.21

EthereumPoW Price Prediction 2030

The EthereumPoW ecosystem is actively growing with new users and may remain viable in the long term. Our EthereumPoW price prediction 2030 forecasts that EthereumPoW is expected to trade between \$14.86 and \$16.21 in 2030.

However, please know the forecast figures are generated using our price prediction tool and in that matter, not a guarantee, that the actual price action will follow what we mentioned. Forecasts are not immune to changing circumstances and will be updated with new developments. Always do your own research and evaluate all necessary factors before making any investment.

Where Can I Buy EthereumPoW (ETHW)?

Notable options for purchasing EthereumPoW include KuCoin, BTCC and Kraken. Among these, [BTCC](#) is one of the best exchanges as it witnesses a large trading volume of ETHW. BTCC is available in U.S., Canada and many other countries in Europe with no regulatory concerns. Furthermore, [BTCC exchange](#) is highly recommended due to its favourable attributes such as extremely low fees, user-friendly interface, excellent customer support, and robust security measures with no reported hacks or security breaches to date.

Buying ETHW on BTCC is simple. Check [here](#) to [create an account](#) on BTCC and choose to purchase ETHW with [USDT](#) and a leverage up to 50x. The transaction is safe, cheap, and fast with VERY easy steps.
