FATTY has announced the upcoming launch of FatBot—an advanced trading bot that promises to redefine the market landscape. Far from being a mere imitation of existing tools, FatBot embodies innovation, simplicity, and effectiveness. As its launch draws nearer, the anticipation is mounting, and for good reason.

Currently, many trading bots in the market fail to meet the demands of modern traders, often bogged down by outdated systems, overly complex designs, and questionable value propositions. FatBot addresses three major pain points plaguing traders today:

- **Clunky and outdated systems:** Many trading bots fail to keep up with the fast-moving crypto industry, resulting in traders being stuck with tools that can't handle the demands of modern

markets.

- **Overly complex user interfaces:** Trading should not be a daunting task. FatBot promises to offer a user-centric design that is accessible to all, ranging from beginners to experienced traders.
- **Flawed monetization strategies:** Unlike other bots that burden users with hidden fees or lackluster value propositions, FatBot prioritizes delivering tangible benefits to its community, steering clear of flawed monetization strategies.

Notably, one of FatBot's distinctive features is its Sniping 2.0 functionality—an exclusive tool designed for trading meme coins on the platform pump.fun. While most bots rely on basic trade executions, FatBot stands out by offering precision and flexibility, empowering users to set custom trade criteria.

Whether you're aiming to capitalize on a fast-rising meme coin or strategically navigating volatile markets, Sniping 2.0 ensures that you remain ahead of the curve.

This advanced tool not only performs well but truly excels, delivering up to 100 more snipes than traditional bots. In an environment where milliseconds can make or break a trade, this feature alone positions FatBot as a game-changer.

## What is the FATTY Token?

The \$FATTY token is the native token of FATTY platform, playing a significant role within the FATTY ecosystem. Players can obtain \$FATTY tokens through direct purchase, staking rewards, or completing a FatBoy challenge.

The utility of \$FATTY token mainly include three aspect:

One of the most attractive features is that \$FATTY functions as a revenue-sharing token. innovative feature allows holders to earn a portion of the fees collected in ETH and SOL. In fact, 50% of all fees are distributed to \$FATTY HODLers, creating a sustainable and lucrative passive income stream in the form of valuable cryptocurrencies such as ETH and SOL.

Furthermore, holding \$FATTY tokens grants a unique advantage when utilizing the Sniping 2.0 feature. The execution speed of Sniping 2.0 is directly proportional to the number of tokens held on-chain. This provides larger token holders with a competitive edge, enabling them to achieve superior and more consistent profits when trading meme coins.

The combination of passive income potential and enhanced trading performance makes \$FATTY a highly attractive option for investors seeking to maximize both short-term and long-term gains.

## FATTY (\$FATTY) Presale

At present, FATTY is under its presale stage. According to its tokenomics, 41% of the total token supply is scheduled to allocate to presale buyers.

As per its whitepaper, FATTY prelese is planned to unfold in 15 rounds, with each stage

experiencing a price increase.

The screenshot displays the \$FATTY website's presale interface. At the top, navigation links include About, Whitepaper, Token, a profile icon, Roadmap, News, and Fatty Store. The main banner features the text "Meet \$FATTY" and "50% Revenue Share Token for the Most Advanced Sniping 2.0 Trading Bot", along with a "Watch Trailer" button. Below the banner are social media icons and several verification badges: "Proofed by Hacken", "Certik KYC Gold", "BINANCE VERIFIED", and a "4.73" rating. On the right, a "Presale LIVE" panel shows the current price at \$0.025 and the listing price at \$0.030. A progress bar indicates that \$5,656,173 USD has been raised out of a \$6,000,000 goal. The panel lists presale payment methods: ETH (Chain ETH), USDT (Chain ETH), VISA, ARB (Chain ARB), USDC (Chain ARB), and BNB (Chain BSC). It also includes input fields for "Pay with ETH" and "Receive \$FATTY", a "CONNECT WALLET" button, and a "Get referral link" option.

Currently, users can buy \$FATTY tokens at just \$0.025 each, with the official listing price set to increase to \$0.030 once the presale ends.

Notably, as of writing this article, FATTY presale has amassed a total of over 5.6 million during the current market bull run, indicating huge demand from crypto enthusiasts.
