Important Factors in Hamster Kombat Airdrop Calculation

Earlier, Hamster Kombat had said that among the metrics for the Hamster Kombat token airdrop, “points per hamster” (PPH) was the most important. You could earn PPH by taking part in the tap-to-earn game in Hamster Kombat and doing in-game tasks.

If Binance is to be believed, 1000 HMSTR tokens will be distributed for every 1,000,000 PPH.

When planning the Hamster Kombat airdrop, disqualification is another important consideration.

Hamster Kombat declared that more than 2.3 million “cheaters” were excluded from the HMSTR airdrop and banned on September 23, 2024.

According to Hamster Kombat, one user flooded the airdrop with 400 accounts, while another sent invitations to nearly 2,000 pals through the referral programme.

Months prior to the TGE, we have been studying user behaviour. According to Hamster Kombat, they have discovered accounts that consistently log in at the same time and tap on the same pixel.

According to the game, 6.8 billion airdrop tokens were removed from the possession of “cheaters.” Half of it will go to the truthful players and the other half will go to waste.
