What is Ovr?

OVER Reality (OVR) is a novel approach to augmented and virtual reality (AR/VR) (VR). It is an Ethereum-based platform for geolocated AR and VR experiences. OVR enables the creation, hosting and visualization of mobile, geo-located AR and VR content. NFTs allow AR/VR materials to be linked to geographic places (ERC-721 standard).

The benefits of using OVR are numerous. First, it allows you to create AR and VR content that is truly unique and engaging. Second, it provides a way to connect AR and VR content to the real world in a way that is both immersive and interactive. Finally, OVR is built on the Ethereum blockchain, which provides a secure and decentralized way to store and manage data.

If you are looking for a new and exciting way to experience AR and VR, then you should definitely check out OVR and its features:

- OVR Treasure Hunt
- OVR Marketplace
- OVR SDK
- OVRExperiences
- OVR Cashback
- OVRAdv

Some of the other key features of OVR include:

- A user-friendly interface that requires no programming skills to create AR experiences
- A library of AR content that can be used to create experiences
- The ability to share AR experiences with others

OVR is the native token of the platform. It is an ERC-20 token and available for users to earn by

participating in the OVR ecosystem. This involves purchasing, renting, or selling OVRLand assets. Furthermore, users can acquire OVR tokens by staking them.

Main Function of Ovr Network

- **OVR Live**

OVR Live is one of the options available on the OVR app. The first thing OVR Live will ask customers to do is upload a photo or take a selfie so they can design their own avatar. Users will have the chance to customize their facial features using the “personalize your face” option, resulting in a very realistic 3D avatar of themselves. Users can then enter events held by open or closed virtual rooms by choosing “Enter In OVR Live.”

- **OVR Live Events**

With the help of blockchain technology and Augmented Reality (AR), users can now watch their favorite artist’s concert from the convenience of their own homes. OVR Live Events will feature musical performances that fans can watch.

Hyper-realistic AR technology captures the artist in real-time and recreates the performance for each fan. Every attendee of the OVR Live Event will experience the performance as though it were directed at them specifically. Additionally, unlike in a live performance, musicians will be able to engage with audiences in a far more private and secure manner.

- **OVRNodes**

The OVRNodes are in charge of hosting assets for augmented reality (AR) and virtual reality (VR). OVRNodes constitute a decentralized interplanetary file system (IPFS) network, providing optimal efficiency for transaction processing and execution.

OVRNodes, like most validator models, are compensated in native OVR tokens for their contributions to the OVR network. This encourages participants to be truthful. Participants are rewarded more for being truthful than for any other type of achievement, such as lousy acting, poor performance, or attempting to defraud the network.

A minimum stake of 500 OVR is required to operate an OVRNode. Additionally, OVR token holders who do not directly manage an OVRNode can vote to select a node by staking tokens on that node.

- **OVRland**

In order to conduct their own auctions, users can buy OVRland, or virtual land. Users can then produce their own original land tokens by minting them. The total number of distinct hexagons in the OVRlands is 1.6 trillion.

The three shapes that may cover the surface of the Earth—square, triangle, and hexagon—were taken into consideration before the OVR team settled on this design. In contrast to their polygonal siblings, OVRlands are hexagonal in shape and have two key advantages.

They are all evenly spaced apart because they are all neighbor transverse. Computed neighbor maps are also made simpler by this. The most nearby sides are provided by hexagons, in addition. The community concept of OVR, which promotes neighbor-to-neighbor user engagement, is consistent with this.

OVRlands are ERC-721 Non-Fungible Token (NFT) standards that stand in for distinct data chunks. OVRExperiences available through the OVR Marketplace can be used to update and enhance OVRland assets (explained further on). A user can also rent, sell, or auction their OVRland assets after purchasing them.

Current OVR Price

At the time of writing, OVR is trading at \$0.4297 with a market capitalization of \$8,877,441, ranking #802 amongst all cryptocurrencies by that metric. In the past 24 hours, the price of OVR coin has decreased by 4.66% with a trading volume of \$3,272,545.

OVR Price Prediction 2023, 2025, 2030

We've covered most of the important things you need to know about Ovr before considering its price

prediction. If you are really interested in investing in the coin, this is the time to be more attentive. Do note, however, that predictions are not a substitute for your own research and due diligence.

Below pulls together our OVR token price prediction for 2023, 2025 and 2030, ensuring you have a rough idea of the coin's future value potential:

YEAR	MINIMUM PRICE	MAXIMUM PRICE
2023	\$0.49	\$0.60
2025	\$1.21	\$1.38
2030	\$1.22	\$1.39

OVR Price Prediction 2023

Ovr, according to some, is one of the most amazing cryptocurrencies to rise this year. The OVR price forecast for 2023 anticipates a significant increase in the year's second half, possibly reaching \$0.60.

As with other cryptocurrencies, the rise will be gradual, but no considerable drops are expected. Averaging \$0.54 in price is quite ambitious, but it is feasible in the near future given anticipated collaborations and advancements. OVR is expected to have a minimum value of \$0.49.

OVR Price Prediction 2025

If the upward trend continues until 2025, it could reach \$1.38 and OVR may profit. If the market experiences a decline, the goal may not be met. OVR is expected to trade at an average price of \$1.25 and a low of \$1.21 in 2025.

OVR Price Prediction 2030

The Ovr ecosystem is actively growing with new users and may remain viable in the long term. Our Ovr price prediction 2030 forecasts that Ovr is expected to trade between \$3.22 and \$3.50 in 2030.

Here, it's worth pointing out that 2030 is still a long way away. 7 years down the line, the crypto market could be affected by a host of different events and updates, each of which is difficult to ascertain. Ergo, it's best that predictions like these are taken with a pinch of salt.

Ovr Price Prediction: Conclusion

Based on the information above, it seems that OVR has a bright future ahead. The minimum price value, average trading price, and maximum price value all point to continued growth in the years to come. The well-researched historical data on the price action and project fundamentals provides a strong case for investing in OVR. OVR is a platform that has the potential to change the way we interact with the world around us. by making AR and VR experiences more accessible and secure.

In closing, please know the forecast figures are generated using our price prediction tool and in that matter, not a guarantee, that the actual price action will follow what we mentioned. Forecasts are not immune to changing circumstances and will be updated with new developments. Always do your own research and evaluate all necessary factors before making any investment.
