PEPE Price Prediction August 2024

PEPE Price Prediction August 2024: Despite currently trending within a falling channel and with the [PEPE price](#) dipping below the 200D EMA, the meme coin has demonstrated a notable intraday surge of 8.85%. This gain hints at a potential bullish crossover in the MACD and signal lines, indicating a possible reversal in trend. If market forces can propel PEPE memecoin above the crucial 200D EMA level, analysts predict an uptrend that could see prices hit \$0.000010. Nevertheless, a failure to maintain this bullish momentum could lead to a retest of the \$0.0000060 support level.

PEPE Price Prediction Q3 2024

In the third quarter, PEPE is poised to exit its pullback phase. As the market heads towards a potential bull run, investors should be aware of resistance that may arise [NEAR](#) the descending 200D and 50D EMA, possibly signaling a death cross. If August closes on a bullish note, it could pave the way for a bullish momentum for the meme coin, potentially driving prices up to \$0.000012 by the end of Q3 2024. Alternatively, if bearish sentiment persists, prices may seek support within the \$0.0000070-\$0.0000080 range.
