## FAQs

### 1. Where do you see Robin Hood in five years?

To broaden our view, we approached Wallet Investor, an algorithmic forecaster, for their prediction of the Robinhood stock price for the next five years. Their research indicates that the share price will drop to \$9.0 by the end of 2028. Analysts' forecasts, while useful, should be taken with a grain of salt. It is essential to gather one's own data and not rely simply on predictions.

## 2. Is Robinhood a secure investment?

Both Robinhood's income and user base have skyrocketed in recent years, demonstrating the company's rapid expansion.

In the first quarter of 2021, Robinhood reported \$565 million in revenue, a considerable rise from the \$128 million reported in the first quarter of 2020. Robinhood went public in July 2021. The GameStop trading craze earlier this year was a major factor in the company's first-quarter 2021 net loss of \$1.4 billion.

Robinhood's business strategy and options trading practices have also been the subject of regulatory criticism in the past. If this leads to fines or other penalties, it could hurt the company's finances.

## 3. Is Robinhood stock a smart investment?
