Dogecoin and EverGrow coin are behind some of the highest price increases in today's cryptocurrency market.

After twitter agreed to Tesla CEO Elon Musk's \$44 billion bid, Dogecoin's price rose 21% in just four hours. EverGrow coin also contacted Tesla and SpaceX after launching a series of brand NFTs to celebrate the launch of its new LunaSky market.

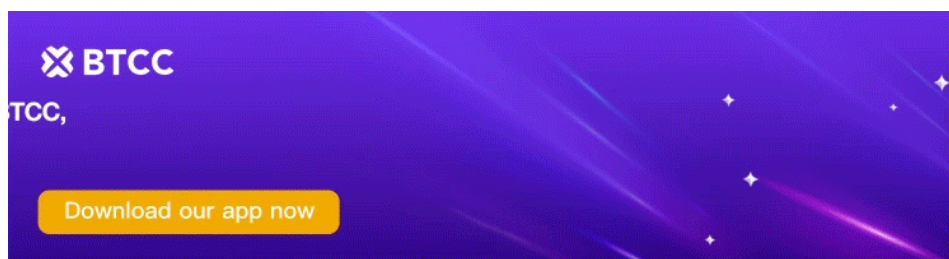

EverGrow Coin Set the Highest Price in the Whole Month

In the past 24 hours, the price of EverGrow currency has increased significantly by 20%, and the price on digifinex exchange is US \$0.000000632. Digifinex is currently the largest cryptocurrency exchange to list EverGrow currency, which was just launched on the binance smart chain a few months ago.

EverGrow coin's price is at the highest point in the whole April — breaking the previous price record of \$0.000000538 at the beginning of the month. EverGrow coin is a super deflationary token that also pays for busd rewards. The transaction tax of 14% sees that 8% is redistributed every 6 hours and reflected to investors as BUSD, while the other 2% is reserved for strategic currency burning.

Once a month, EverGrow coin's professional investment team uses its application ecosystem revenue and 2% transaction tax to burn money on a large scale. Burning coins means buying \$EGC tokens from the market and permanently removing them from the supply.

EverGrow coin is expected to burn 0.5% of its total supply every month from now on.

Dogecoin Prices Rebounded Sharply at the End of April

Dogecoin is Elon Musk's favorite. It's no secret. Therefore, it is not surprising that Dogecoin has become the fastest-growing cryptocurrency today (April 26) after twitter approved Musk's acquisition offer.

According to coinmarketcap, Dogecoin is one of the only two encrypted tokens in the past seven days, and the price of Dogecoin has increased by 13%. Dogecoin currently trades at \$0.1588. Just a few hours ago, the price of Dogecoin reached a daily high of \$0.1673.
