## BENDOG Tokenomics

The BENDOG token is designed as the central currency within the Ben the Dog ecosystem. It's structured to support a vibrant and active community, and features the following:

- **Liquidity Pool Burns:** To ensure stability and reduce price volatility, a significant portion of the BENDOG tokens allocated for liquidity purposes have been permanently burned. This

action decreases the total circulating supply, potentially increasing the scarcity and value of the remaining tokens over time.

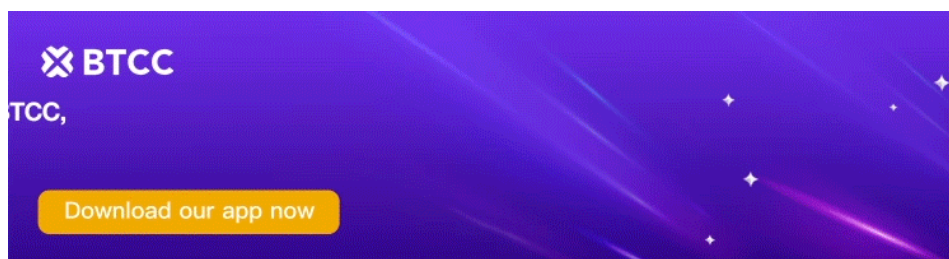

- **0% Tax:** BENDOG imposes a 0% tax on transactions. This feature is particularly attractive, since it encourages more frequent trading and usage of the token without the disincentive of transaction fees, thereby promoting greater liquidity and accessibility.

The total supply of BENDOG tokens is capped at 1 billion. This finite supply is intended to prevent inflation and maintain the token's value, providing a clear limit to the number of tokens that will ever exist.
