What is CYBRO (\$CYBRO)?

CYBRO is an AI-based yield aggregator platform built on the Blast blockchain. CYBRO offers multiple investment vaults and strategies tailored to the user's needs. On CYBRO platform, users can select investment tools based on desired returns and risk levels.

Characterized by a set of investment Vaults (Strategies) for yield farming, CYBRO offers two kinds of strategies: decentralized and centralized. Decentralized (Non-Custodial) Strategies provide more safety for the user, but they require actions and decisions on the user side. Centralized strategies offer users greater independence in services, yet they come hand in hand with higher risks.

As CYBRO is built on Blast L2, CYBRO is capable of utilizing its main advantages, offering a high native APY. Besides, CYBRO also lays great emphasis on seamless liquidity input/output and investment selection. Therefore, CYBRO aims to develop infrastructure for fiat currency transactions.
