Xai (XAI) Price Prediction 2024, 2025, 2030— Is XAI a Good Investment?

Original:

<https://www.btcc.com/en-US/academy/research-analysis/xai-xai-price-prediction-2024-2025-2030-is-xai-a-good-investment>

Even with the tremendous speculation about [Bitcoin](#) ETFs, the January 9, 2024, debut of the Xai network caught investors' attention and made news. This highlighted layer 3 networks, of which Xai is one, as well as blockchain gaming tokens.

We discuss the features and applications of Xai in detail in this price projection, and we employ the data on this network and token to project prices for 2024, 2025, and 2030.

Xai (XAI) Price Prediction Summary

- Xai, the token for a specialised gaming layer 3 based on the Arbitrum Ethereum rollup, was launched at the start of 2024.
- XAI started trading at \$0.20 on Binance, while the starting price according to CoinMarketCap data is \$0.6767.
- After being listed on CoinMarketCap, XAI reached its all-time high (ATH) of \$0.7864 in less than 30 minutes before falling to its all-time low of \$0.4531 in just over 24 hours.
- Xai appears to have landed in a range between \$0.60 and \$0.70 while it is still in price discovery mode.
- According to our Xai price prediction, Xai will rise above \$1 within its first year of existence and reach a peak of \$1.12 as a result of network game releases.
- We project that the Xai network and its token will be doing quite well by 2030, with a peak of \$5 anticipated.

Year	Low Price	Average Price	High Price
2024	\$0.45	\$0.98	\$1.12
2025	\$0.7	\$1.2	\$1.8
2030	\$1.5	\$2.1	\$5

What is Xai (XAI)?

The Xai layer 3 blockchain was built specifically to address the issues of scaling Web3 games, and its native currency is the XAI token.

The Xai blockchain is based on Arbitrum layer 2, which in turn is based on Ethereum, the second most valuable blockchain in the world. Xai is another hopeful rollup, and its creators, Offchain Labs, are also responsible for Arbitrum.

Offchain Labs will carry on developing the Xai roadmap and any subsequent updates needed by the Xai Foundation, which oversees the rollup.

Xai (XAI) Price History

Launched on January 9th, 2024, at 9:30am UTC, the Xai token was originally scheduled to debut over the 2023 holiday season, but was postponed owing to team members' health problems. An airdrop will be held to deliver 5% of the token supply to early participants in the network. This includes Xai network validators, operators of Sentry Nodes, and owners of a specific Xai NFT.

Binance was among the top cryptocurrency exchanges that made the XAI token available upon launch. Users of Binance could stake other cryptocurrencies in order to earn XAI tokens before the token's debut.

Upon listing on Binance, the Xai token cost \$0.20. According to CoinMarketCap, Xai started at \$0.6767, but the token price soared after that, reaching its all-time high of \$0.7864 in under thirty minutes.

The price of Xai cryptocurrency then fell to a new low of \$0.4531, a 42.4% drop in less than 24 hours. It appears that the Xai token price has found an initial short-term range between \$0.60 and \$0.70, and has since climbed. But, with this coin's launch being a little over 48 hours ago, price discovery is far from over.

Xai (XAI) Price Prediction 2024

The SEC approved all eleven Bitcoin ETF proposals at the start of the year, so 2024 is shaping up to be a fascinating year for cryptocurrencies. In estimating the value of Xai in 2024, we will consider both internal and external factors, such as upcoming changes to the Xai ecosystem and global events.

Keep in mind that the Xai token price is now in the discovery period as of this writing. But that won't

stop us from utilising all the data at our disposal to make a Xai token prediction.

Xai (XAI) Price Prediction Q1 2024

Following the airdrop of XAI tokens in January of 2024, the Xai network formally debuted in the first quarter of that year. According to the Xai roadmap for Q1 of 2024, the main focus this quarter will be on getting the mainnet ready to receive the first game in Q2. We will also be deploying a lot of essential utilities to Xai and establishing partnerships with bridges and marketplaces. The Xai token price will rise after the announcement of these successful developments.

Approval of Bitcoin ETFs set the tone for the entire cryptocurrency market in 2024. This caused the price of numerous popular altcoins to surge, possibly due to speculation that they will be the next cryptocurrency exchange-traded fund (ETF) to enter the mainstream financial market.

Xai (XAI) Price Prediction Q2 2024

The Xai network will debut its first game, Final Form, a trading card game that is entirely on-chain, in the second quarter of 2024. According to the Xai plan, not only will one of the top game developers in the industry deploy to the Xai network, but the other will do the same for their complete game library. We don't yet know who these partners are, but once we do, news of their partnerships and other endeavours will likely boost demand for the Xai token and its value.

In a broader sense, the cryptocurrency community is gearing up for the Bitcoin Halving event in the second quarter of 2024. Although there has been typically little price movement in the days leading up to the event, this year may be different due to the introduction of ETFs, which will allow Bitcoin to access a new pool of institutional capital. Because altcoin values tend to follow Bitcoin's price movements, any impact on Bitcoin's price could have repercussions on altcoins as well.

In 2024, the Federal Reserve is anticipated to decrease interest rates a minimum of three times, according to even more distant macroeconomic projections. By the end of the first quarter or early in the second, you may anticipate the first of these fee increases. Many believe that these cuts are a signal for investors to shift their focus to more volatile assets, such as cryptocurrencies. This might

lead to a resurgence of interest in the asset class and a favourable effect on many different coins.

Xai (XAI) Price Prediction Q3 and Q4 2024

Two gaming businesses will have their products on the Xai network by the third quarter of 2024, and at least one game will be available on the platform. The demand for the Xai token, which is directly correlated to the network's use and popularity, will drive up its price as the network grows in popularity. On the other hand, "Nodes, community & DAC" have 50.1% of the XAI supply allocated for distribution, which increases the available supply and could lead to further selling pressure for the token.

The team and first investors are set to receive 42.4% of the token supply, which means that they will also begin unlocking them at the beginning of Q3. This could lead to a decrease in price.

Globally, the Federal Reserve is anticipated to keep cutting interest rates well into the year's end, which might be good news for the cryptocurrency market.

Xai (XAI) Price Prediction 2025

Nothing useful for Xai currency prediction is available in the present Xai roadmap, which concludes in July 2024. Having said that, we are aware of four additional games under development on the network, and it is quite probable that players will be onboarding for both the games that have already debuted and those that are still in development.

The Xai token's demand will rise if these games do well and more developers keep making games on the Xai network. Nevertheless, the Xai price will continue to be impacted by the continued emission of tokens to the community, team, and initial investors.

Bitcoin and several other altcoins reach new all-time highs (ATHs) between twelve and eighteen months after a halving event occurs, according to historical price data. This influence is felt throughout the cryptocurrency ecosystem. If previous patterns are repeated, Xai's price will rise in tandem with other market segments.

We anticipate Xai to reach a high of \$1.80 if all the favourable outcomes materialise. But with the team and early investors selling off tokens, the price of Xai might go as low as \$0.70 in 2025, according to our projection. Additionally, we anticipate that Xai will average \$1.20 in 2025.

[TRADE_PLUGIN]XAIUSDT,ETHUSDT[/TRADE_PLUGIN]

Xai (XAI) Price Prediction 2030

Looking as far into the future as 2030 makes our vision less clear because we can't be sure of what will happen in that time. But we can construct a Xai price prediction for 2030 based on forecasts and what we know about upcoming occurrences.

To begin, experts predict that the blockchain gaming industry will expand from its current state by 2030, with a CAGR of more than 60%. The Xai price is poised to experience tremendous increase over this era if the Xai network is able to solidify its position as a leading gaming blockchain, which is highly anticipated given the impressive rate of growth.

By this point, there will be a significantly larger supply of XAI tokens in circulation, and token emissions will have a significantly smaller impact on token price. By 2030, when we anticipate the network to be popular and extensively used, the price of XAI will be driven upwards due to the fact that all petrol fees are paid in Xai and burned.

Lastly, following the Bitcoin Halving event in 2028, we may see a decline in price around 2030 if the price behaviour of Bitcoin continues to follow its historical 4-year cycles.

With a possible high of \$5 in 2030 (if all goes according to plan with the expansion of the network and the rising popularity of blockchain gaming), a low of \$1.50, and a median price of \$2.10, the years leading up to 2030 appear to be promising for the XAI token.

Is Xai (XAI) a Good Investment?

Xai token, the native currency of a dedicated gaming blockchain constructed as a Layer 3 on top of Arbitrum, one of Ethereum's most popular rollups, is a sure bet to invest in given the expected tremendous expansion of the blockchain gaming business over the next 6-8 years.

However, traders planning to enter the market in the near to medium term should brace themselves for a great deal of volatility as tokens are produced at a dizzying rate over the next few years. This deluge of good news could put too much downward pressure on the price when it finally lets up.

Those planning to hold Xai for the long haul should bear in mind that the success of blockchain technology in monetizing markets like gaming hinges on the market's continued maturation, traditional investors' adoption of cryptocurrencies, and the global implementation of crypto regulations.

[TRADE_PLUGIN]XAIUSDT,ETHUSDT[/TRADE_PLUGIN]

Conclusion

Xai is the latest craze in the cryptocurrency gaming industry, and it has its own blockchain that's specifically designed to make blockchain games better for everyone.

Does Xai, which has releases planned for this year, qualify as one of the top cryptocurrencies to invest in in 2024?

Xai (XAI) Price Prediction FAQs

Will Xai rise \$10?

We don't anticipate the Xai token reaching \$10 anytime soon because they will be emitted over an extended period of time. Nonetheless, we do anticipate that it will peak at \$5 in 2030.

In 2024, how much will Xai be?

In 2024, we anticipate that Xai will reach its highest points of \$1.12, as the coin gains momentum following the triumphant launch of the network's inaugural game. In the middle of the year, when early investors sell their first shares of coins, we also forecast lows of \$0.45.

In 2025, how much will Xai be worth?

Our price forecast indicates that in 2025, Xai will trade in a band of \$1.8 to \$0.7. Events and product releases within the Xai ecosystem will also have an impact on prices.

What will the cost of Xai be in 2030?

Our long-term Xai price projection for 2030 is \$5 at its peak, assuming that blockchain gaming and the network turn out to be the enormous success that is anticipated. This is in addition to average prices of \$2.10 and lows of \$1.5.
