New Meme Coins to Buy : AiDoge, Milady, PEPE And \$SPONGE

Original:

<https://www.btcc.com/en-US/academy/crypto-basics/new-meme-coins-to-buy-aidogemilady-pepe-and-sponge>

Several new meme coins launched in the spring of 2023, and they were an instant hit. Get in before the price goes through the roof!

Four “top models” would surely steal the show during a fashion show featuring [meme coins](#): [Pepecoin \(\\$PEPE\)](#), [Milady \(\\$LADYS\)](#), [AiDoge \(\\$Ai\)](#), and [Spongebob Token \(\\$SPONGE\)](#). A new question arises: is the success of these 4 meme coins during the “Spring 2023 season” transient, or may we expect more from them in the future?

Have Milady (\$LADYS) and Pepecoin (\$PEPE) peaked?

Without a doubt, Pepecoin (\$PEPE) is one of the most successful meme coins this season. The first people to invest in [PEPE](#) saw a huge return on their money, while those who waited felt like they missed out on a great chance. Users became more interested in [PEPE](#) after its meteoric rise to fame, while investors saw fewer opportunities for lucrative returns on their money. There is little hope for PEPE to replicate its success, say [crypto](#) professionals and influencers. Therefore, it would not be wise to invest in PEPE at this time.

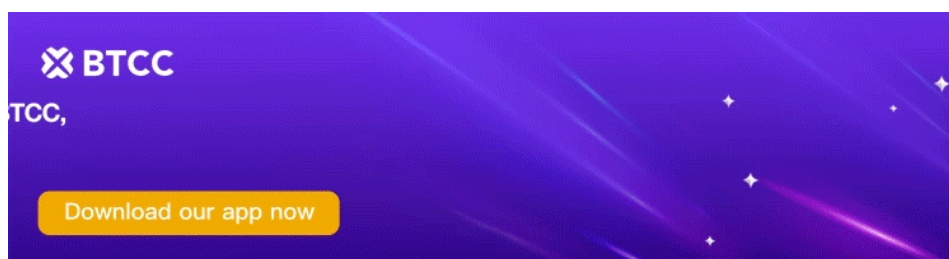

Milady (\$LADYS), a new meme coin that had a 1000X growth in just a few days, is enjoying comparable success to PEPE this spring. We must be honest and state that crypto professionals are split on their forecasts for this meme coin. While a big portion of the cryptocurrency community is bullish on Milady (\$LADYS) and predicts that its value will continue to rise in the coming months, an even larger portion of the cryptocurrency community is bearish on the future of this meme coin. They justify their pessimistic outlook by noting that Elon Musk's tweet is likely a major factor in driving up the price of this coin artificially. Their conclusion: Milady's (\$LADYS) success has been artificially created, and investors would be better off putting their money into other meme coins with more potential for long-term growth.

Pepecoin (\$PEPE) and Milady (\$LADYS) seem to have peaked; therefore, it could be prudent to focus on "stars" that, while already successful, have yet to reveal their full potential.

AiDoge (\$Ai): Record-breaking meme coin!

The cryptocurrency community at large is generally enthusiastic, but when it comes to AiDoge (\$Ai), experts are significantly more bullish than they were about the meme coins we discussed before.

They have faith in the future success of a currency that, in a short amount of time, raised over \$9.5 million in a presale and provided significant benefits to its users.

AiDoge is a breakthrough meme generation platform that makes it easy for anyone to make their own memes. AiDoge uses AI and text prompts you provide to generate funny, relevant, and original memes in seconds, which you can then share on the platform's Public Wall with other users. You can show off your artwork on the AiDoge platform's Public Wall, and other users can vote on your meme to determine its popularity. If it receives the most votes, they will be rewarded with even more \$Ai tokens.

However, AiDoge also provides the option of staking, which opens the door to new incentives and privileges, and, most importantly, the chance to invest early in the \$Ai token, which is expected to appreciate greatly in value in the coming months. The \$Ai token has not yet reached its potential; thus, you should purchase some now before its value rises again. Pre-sale of AiDoge is almost to \$10 million, so don't delay.

Next big thing in meme currency is SpongeBob (\$SPONGE).

Besides the \$Ai token, the Spongebob token (\$SPONGE) is another excellent option if we're talking about the best new meme currencies you should buy right now. The \$SPONGE meme coin has only been out for a short time, but it has already generated a ton of interest from users.

We can all agree that the inspiration for this trendy meme currency comes straight from the ever-popular Spongebob Squarepants. The immense demand for the \$SPONGE token and the success of this meme coin on social media prove that playing the "nostalgia card" is a smart strategy. More than 40 thousand people follow \$SPONGE on Twitter.

Experts in the cryptocurrency industry have dubbed \$SPONGE "the next PEPE coin" due to its meteoric rise in value after its Uniswap debut, and this meteoric rise is expected to continue, if not accelerate, in light of the additional listings. MemeCoin is a very new cryptocurrency, but it has already broken into CoinMarketCap's top 10 meme coins list. MemeCoin is also listed on LBank, CoinW, and Poloniex, all of which are well regarded exchanges. If you want \$SPONGE at today's pricing, don't procrastinate.

Conclusion

There's no denying it: 2023 will be known as the year of meme coins. It's clear from the success of the widely-used PEPE coin and the brief run of the young \$LADYS that this is the case. The groundbreaking \$Ai token and the young but incredibly popular \$SPONGE provide the most convincing evidence, however, why investing in meme currencies is the smartest option you can make. The new \$COPIUM is predicted to behave in the same way.

Even if these top new hot meme currencies are doing exceptionally well right now, we have yet to see them in their full glory over the next few months. So make a good choice, hurry up and get them while the going rate is so low. You won't have time to blink before their value skyrockets.
